# Customer praise

In 2021, we still have fresh memories of the heavy rain at the station before the bulk carrier is loaded, the delivery before the implementation of the new control policy, the change of the operation of dangerous goods policy, etc.

There are stories happening all the time. **But the product was delivered smoothly.**

Dear Mr. Ye and Doris,

I always appreciate your cooperation.

Despite the work that doesn't proceed with the actual contract, I always thank you for your kind and quick response every time.

Next year, I'll do my best to make it a year when both companies to thrive.

I prepared a small gift with my heart, so please accept it with gratitude.

Happy new year that's coming!

- Devin -

*Thanks for Devin's mail and gifts.*

# Main Business in 2021

**Colorants** can be divided into dyes and pigments, the main difference is solubility.

**Solvents** Many different solvents are used in a wide variety of everyday product applications – from paint, personal care products and pharmaceuticals, to pesticides, cleaners and inks. Without solvents, many products we rely on would not perform as well.

**Coating Additives** also known as paint auxiliaries, are auxiliary materials for the preparation of coatings, is an indispensable component of coatings, which can improve the production process, maintain stable storage, improve construction conditions, improve product quality, and give special features.
